FRUIT PICKLES AND CHUTNEY

**Fruit Pickles** are usually prepared from whole fruits and simmered in a spicy, sweet and sour syrup. Pickled fruits are an ideal accompaniment for meat, poultry and fish entrees.

**Chutney** is a fruit relish made from chunks of fruits and/or vegetables and nuts cooked in a sweet and sour blend of herbs, spices, sugar and vinegar. Chutney is served as a condiment with foods such as meats, poultry, and sandwiches.

**INGREDIENTS**

**Fruit:** Select slightly underripe fruits. (Underripe fruits will retain their shape and texture better after pickling.) Fruit is usually pickled whole or halved. Select uniform size pieces for each jar. Fruits suitable for pickling include apples, crab apples, peaches, pears, figs, plums and watermelon rind. Smaller fruits such as blueberries, seedless grapes and gooseberries can also be pickled.

**Vinegar:** Use a high-grade cider or white distilled vinegar of 5% or 50 grain acidity. Cider vinegar has a mellow acidic taste but may darken light colored fruits. White distilled vinegar has a sharp, pungent, acidic taste and is recommended for light colored fruits. Do not dilute the vinegar unless specified in the recipe.

**Spices:** Because ground spices will change the color of the fruit pickle, whole spices are better. Spices are usually cooked in the brine and then removed before the pickles are processed. You can vary the spices you add. Ground spices can be used in chutney recipes and are usually not removed before canning.

**Sugar:** You can use either white granulated or brown sugar in pickle recipes. Brown sugar should not be used with light colored fruits.

**PREPARATION AND STORAGE**

Follow preparation instructions. For long term storage, process in a boiling water canner as directed. After the jars have cooled and sealed, remove screwbands, and wash jars. Store in a cool, dry, dark place.

Fruit pickles and chutney can also be refrigerated for short term storage.
