

2005
Oregon County and State
Agricultural Estimates

Special Report 790-05, revised April 2006

2005 Oregon County and State Agricultural Estimates

Oregon Agricultural Information Network (OAIN)
Extension Economic Information Office
Department of Agricultural & Resource Economics
Oregon State University

This report provides a quick overview of Oregon's recent crop and livestock production. The following pages include 2005 preliminary estimates for production and value. In addition, there are revised estimates for 2004 and 2003. Preliminary or first estimates are revised as needed when updated information is received. All of the data reported here were in our database as of March 23, 2006. We collect only farmgate level data. That means that no marketing charges or government payments are included in our price estimates.

Web access is provided for you to review and download the publicly available numbers that we update periodically in our database. The URL for our homepage was changed in early 2006 to: <http://oregonstate.edu/oain>. This publication, as well as earlier versions, can be obtained by clicking on the "Commodity Data Sheets" button on our homepage and then on "All Commodity Summaries."

To see any portion of our database accessible to the public, you may click on the homepage button, "OAIN Database." No username/password is required; just click on the "Next" button below the login boxes. You may then bring up preformatted reports on the menu provided or click on "User Defined Report/Query" to create your own tables. These tables may be displayed on your monitor and downloaded for printing. Or, you may select an EXCEL spreadsheet output for further analysis.

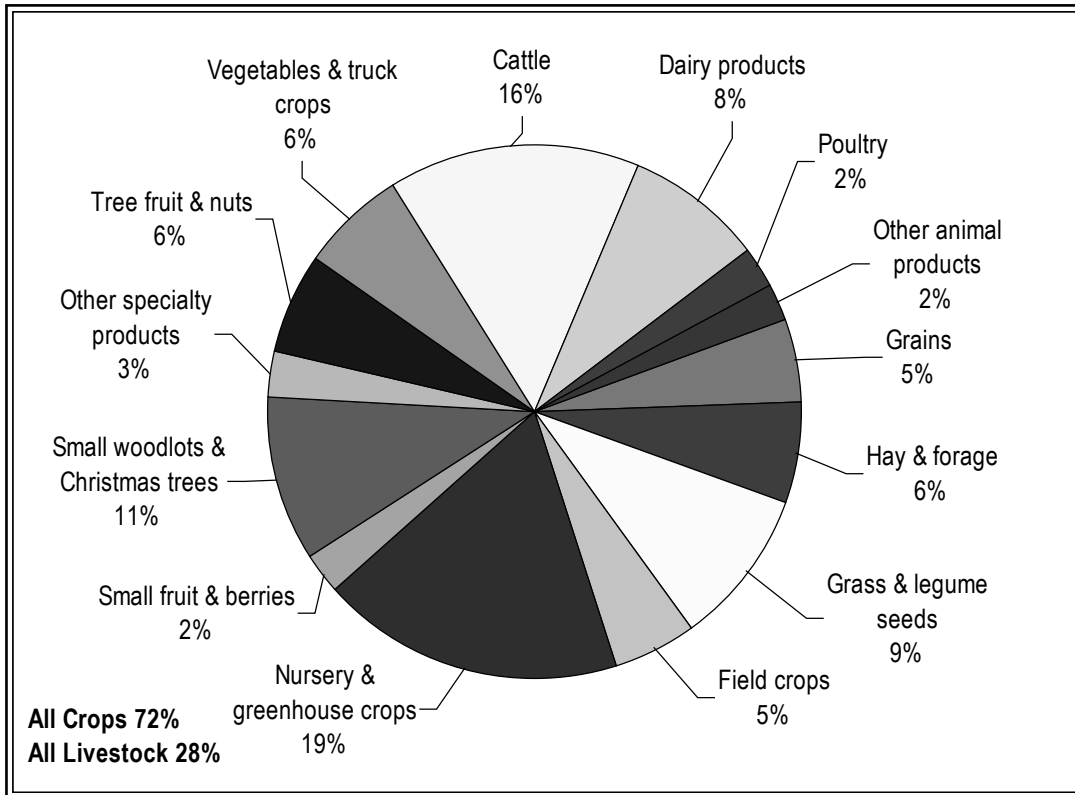

We try hard to protect confidential data from being viewed by agricultural industry members or the general public. That is done by hiding them within our database or by combining them with other commodities in county, regional, or statewide summaries. Our definition of confidentiality is similar to that used by the Oregon Agricultural Statistics Service, USDA: any data that represent fewer than three producers or one producer with 60 percent or more of the identified production are confidential.

The data we provide are obtained from a team of about 70 OSU Extension faculty from around the state. They are knowledgeable about selected crop and livestock production in the counties that they serve. These numbers reflect their best judgment with respect to commodity production, prices, and usage patterns over time. The data represent overall annual values. It is important to recognize that their choices for aggregating data may shift the gross farm sales ranking of specific commodities and sectors.

Some commodities, such as some livestock forages, are frequently produced, in part, for on-farm use. A single price estimate is made for each county's production regardless of whether it is sold in an open market environment or consumed as an input to the production of other commodities, e.g., beef cattle, dairy cattle, or sheep. The value of production estimate reflects the entire value of the commodity without regard to whether it is sold or consumed on-farm. The percent of sales for the commodity is also estimated. That percentage is multiplied by the value of production estimate to derive the estimated value of sales. Thus, for commodities that are consumed on-farm in other enterprises, the value of production would be significantly higher than the value of sales.

A special thank you to Robert Clark, President, Dixon Creek Software, Corvallis, Oregon. Mr. Clark was the programmer who created the software necessary to make the OAIN system operational. We are now able to collect and disseminate data electronically. He continues to provide technical support and upgrades.

Agricultural Commodity Sales Oregon, 2005p

2005p Sales by Commodity

\$1,000

Field Crops	203,105
Grains	198,829
Grass & Legumes	373,490
Hay & Forage	258,202
Nursery & Greenhouse Crops	751,623
Small Fruit & Berries	97,205
Small Woodlots & Christmas Trees	411,867
Other Specialty Products	114,856
Tree Fruit & Nuts	244,486
Vegetables & Truck Crops	261,644
All Crops	\$2,915,307
Cattle & Calves	619,491
Dairy Products	340,062
Other Animal Products	92,333
Poultry	97,276
All Livestock	\$1,149,162
All Crops & Livestock	\$4,064,469

*Calculations may not balance due to rounding. p=preliminary, (x)=not applicable. Values are in thousands of dollars (10,000 = \$10,000,000)
 Quantity sold and value estimates are aggregated up from individual county data. Livestock such as cattle and sheep may be present in a given county for only some portion of the year. For these commodities, the value of sales are based on the value added while the livestock were present in the county, rather than on the number of animals sold.
