## Oregon County and State Agricultural Estimates

Special Report 790 / Revised April 1999

OREGON STATE UNIVERSITY EXTENSION SERVICE

## 1998 Oregon County and State Agricultural Estimates

Prepared by Sandy Sears  
Economic Information Specialist  
Oregon State University

The following pages report preliminary estimates for the value of sales and agricultural production for the 1998 crop year. Also reported are revised numbers for 1997 and 1996. Preliminary or first estimates are revised as updated information is received by our office. These published estimates are those reported to our office as of March 19, 1999. Estimates are collected and organized through Oregon State University Extension Service personnel. Once county estimates are complete, state totals are tabulated for this special report. Estimates are revised periodically as new information becomes available. These revisions are posted to our Web site noted below.

“Other farm income,” particularly *farm forestry* or *small woodlot products*, is included in these agricultural estimates. Farm forestry has become quite significant over the years, reaching \$259.1 million (pg. 4). Caution should be used in comparing these agricultural estimates with the Department of Forestry numbers, as this may lead to the double counting of sales.

This report is designed to provide a quick overview of Oregon’s agriculture for this past year. The Extension Service maintains detailed information for Oregon and United States agriculture. Commodity Data Sheets are published throughout the year, reporting major agricultural commodities produced in Oregon. These contain a county-level breakdown of production, data on other Northwest states or other states important to the specific commodity, and total figures for the United States.

Commodity Data Sheets are published by groupings: grains and hay, field crops, tree fruit and nuts, small fruits and berries, vegetable and truck crops, specialty products, livestock and poultry. If you are interested in more information contained in the Commodity Data Sheets, contact:

Economic Information Office

Thank you to all the county Extension agents and specialists who assisted our office with the development of these estimates for all the crops and livestock throughout Oregon.

A special thank you to Robert Clark of Dixon Creek Software for his programming talents. Mr. Clark rebuilt our software programs, which collect and house our statistics and generate our county- and state-level statistical reports.

---

The Oregon State University Extension Service educates Oregonians by delivering research-based, objective information to help them solve problems, develop leadership, and manage resources wisely.

Extension's agriculture program provides education, training, and technical assistance to people with agriculturally related needs and interests. Major program emphases include food and fiber production, farm business management, marketing and processing of agricultural products, resource use and conservation, and environmental preservation and improvement.

This publication was produced and distributed in furtherance of the Acts of Congress of May 8 and June 30, 1914. Extension work is a cooperative program of Oregon State University, the U.S. Department of Agriculture, and Oregon counties.

Oregon State University Extension Service offers educational programs, activities, and materials—*without regard to race, color, religion, sex, sexual orientation, national origin, age, marital status, disability, and disabled veteran or Vietnam-era veteran status*—as required by Title VI of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, and Section 504 of the Rehabilitation Act of 1973. Oregon State University Extension Service is an Equal Opportunity Employer.
