Agriculture, 4-H Youth, Family & Community Development, Forestry, and Extension Sea Grant Programs. Oregon State University, United States Department of Agriculture, and Clackamas County cooperating. The Extension Service offers its programs and materials equally to all people.

4-H Fish Stewards is a program offered twice-yearly in partnership with the Oregon Department of Fish and Wildlife and their Salmon Trout Enhancement Program (STEP). By raising and hatching fish in a classroom, kids develop an understanding of the natural connections between strong stewardship and healthy habitat. In addition, they learn how to apply science and math skills in a hands-on setting as they monitor egg development, test water quality, and release trout or salmon fry.

OSU Extension Service provides fish tanks, chillers, and water quality testing supplies to participating teachers.

If you are interested in becoming a Fish Steward classroom teacher, or would like more information about this program, contact OSU Extension Service.
