Succession Planning Workshop for Landowners

**Why is this workshop important?**

If you own and care for forest land, the fate of your land is probably important to you. You hope the work you’ve started will continue past your lifetime and that future generations will benefit from your efforts. **But hope is not a plan.** Preserving your legacy requires planning, and that involves more than just having a will or an estate plan.

**What will it cover?**

This workshop is a mix of presentations and practical exercises that will give you the knowledge and tools to start succession planning.

You will:

- Gain awareness of key challenges, and tools to deal with them
- Get tools to determine your heirs interest
- Clarify your values and goals
- Learn the steps to success planning
- Learn how to hold effective family meetings
- Learn about legal and financial instruments that can support your plan
