Please bring maps, aerial photos, and the legal description of your land with you to the August 20 class. Maps and photos can be obtained at the Douglas County Surveyor’s Office or on the web at (http://www.co.douglas.or.us/puboaapuboaapuboa_search.asp). You can get a composite map with aerial photo, topographic features, soils and property boundaries by visiting the Douglas County Surveyors Office. The map is custom-produced and may not be immediately available, but is an excellent planning tool. It is available at a modest fee, and can be printed out at a variety of sizes/scales. GIS maps are not available online in Douglas County, so you need to go the surveyor’s office to get them. More information about forest management planning is available on the Douglas County OSU Extension Forestry website: http://extension.oregonstate.edu/douglas/forestry/fmps.php
