Sustainable Landscape Certification Training
December 9-10, 2008; 9 AM – 5 PM; Cost: $50
OSU Extension Service - Lane County Auditorium
950 W 13th Ave., Eugene, OR
extension.oregonstate.edu/lane

Certification Topics:
• Water-Wise Gardening
• Mulch and Compost
• Gardening for Wildlife
• Stream Side Gardening
• Yard Pest Control
• Right Plant-Right Place
• Lawn Care
• Storm Water Runoff

The purpose of the Sustainable Landscape training is to provide the public with practical information to design sustainable/green/ecological landscapes. Participants will learn to utilize landscape practices that can be applied to their own yards. Homeowners will benefit by improving their soil biology, reducing erosion, saving money by using fewer pesticide and fertilizer inputs, and improving groundwater quality and quantity. Other expected outcomes include lowering power, water and waste bills due to more efficient use of resources, and reducing the flow of organic matter into the landfill.

Participants will complete a yard evaluation upon completion of the course and then a follow-up evaluation a few months later to see what improvements have been implemented. With an evaluation score of over 40 points the homeowner will earn a placard to display in their yard showing that their yard has been certified by OSU Extension Service as a Sustainable Landscape.

Please make check(s) payable to: OSU Extension Service - Lane County
Cost $50 per person
Mail check(s) to: OSU Extension Service - Lane County
