Photocopy this form for additional registrations or print from this web site: extension.oregonstate.edu/lane

For registration information contact Julie at (541) 463-4615. For program information contact: Ross Penhallegon or Linda Renslow, (541) 682-7313 or (541) 682-7308.

We will endeavor to provide public accessibility to services, programs, and activities for people with disabilities. If accommodation is needed to participate at any meeting, please contact the ADA Coordinator at the Lane County office of OSU Extension Service at 682-4243 at least two weeks prior to the scheduled meeting time.
Sustainable Landscape Training

A special sustainable landscape training has been set for January 22 & 23, 2009 at Lane Community College, 4000 East 30th Avenue, Eugene for any and all people involved in landscaping, working to maintain sustainable landscapes. We have applied for continuing education credits. The cost for the two day session is $110. Registration is through Lane Community College, Business Development Center, 1445 Willamette St, Suite 1, Eugene, OR 97401 or call Julie at 541-463-4615.

The purpose of this training is to teach landscape professionals how to develop and maintain sustainable/green/ecological landscapes. Topics to be covered include water efficiency, mulching/composting, “positive” wildlife habitat, yard pests, containment strategies, planting the right plant-right place, proper fertilizer applications, storm-water runoff options and streamside care, and lawn care.

Expected outcomes include: improving water quality, reducing the use of pesticides (organic or conventional), improving soil quality, reducing erosion, building soil biology, and improving the quality and quantity of groundwater. Other benefits will be lower power, water and waste bills due to more efficient use of resources, and a reduced flow of organic matter into the landfill.

Lane County Farm Business Management Program - All Growers Invited!

We are pleased to invite you to the Farm Business Management (FBM) Program’s “Kick Off” event, which will launch an exciting new chapter in the program. This year we are combining the forces of the Oregon State University Extension Service - Lane County and Lane Community College’s Small Business Development Center. The format of the FBM Program will include classroom education on many subjects, including hand-on training on topics such as Crop Practices, Application of Pesticides, and Effective Pruning Techniques along with Business Planning, Financial Analysis, and Computerized Record Keeping.

Our “Kick Off” event will take place on December 3, 2008, at 6 p.m., Room 106, at the Lane Business Development Center (BDC), at 1445 Willamette Street, Eugene. This first meeting will provide you with the opportunity to meet the instructors, check out the variety of current materials and resources available to you, and learn more details about the structure and content of our new ground breaking FBM Program. We will also be asking for input from you on what subjects you would like to see added to the program. So bring your ideas on how the program can best serve you.

The FBM Program is an opportunity for you to attend classes, receive personalized individual advising, and receive hands-on practice using this knowledge. The FBM Program includes classes and one-on-one advising sessions. Please let us know if you will be able to attend. Just drop us an email at SkidgelJ@lanecc.edu or call (541) 463-4615. We look forward to seeing you on December 3 at the BDC.
Legacy Pesticide Collection

A third Legacy pesticide collection is scheduled for January 2009. The purpose of the Legacy pesticide collection is to collect and properly dispose of old pesticides that are no longer labeled or are in poor condition. The goal is to remove as much old or Legacy pesticides from the farming community, thus preventing future spills and/or contaminations in the lower valley.

In the last two years over 78,000 pounds of pesticides were collected. If you have old pesticides, please fill out the following information so we can contact you later.

Name ___________________________
Address __________________________  City _____________ State____ Zip____________
Phone _____________  Cell ______________  Email _______________________________

How much pesticides do you need to dispose of? _______________ pounds
_______________ gallons

The more we know, the better we can plan for this disposal. All information is confidential.
