Land Steward

# Carbon Sequestration

How It Works. How It Makes a Difference.  
How You Can Help!

**Date:**

**Tuesday, March 20, 2017**

**Time:**

**6:00 PM to 8:00 PM**

**Location:**

**OSU Extension Auditorium  
569 Hanley Rd.  
Central Point, Oregon**

**To Register:**

<http://bit.ly/LandStewardClasses>

**Or call: 541-776-7371**

**Register Deadline: Day of Class**

Charge: \$15.00 (Couples \$25;  
\$5 discount to OSU volunteers  
with badge)

## Soil

### The Repository for Surplus Atmospheric Carbon

This class looks into the various ways that carbon and carbon dioxide are stored in the soil. We will discuss how current research is providing methods of soil and crop management that enhance these processes. It is becoming clear that the methods used in system like Biologically Enhanced Agricultural Management and Climate Smart Farming could have a significant impact on lowering greenhouse gasses in the atmosphere and, at the same time, develop richer and more drought-resistant soils.

**Scott Goode** is a retired environmental scientist, who worked in water treatment, bioremediation, and modeling the role of environmental factors in soil chemistry. He is currently developing farm-based carbon sequestration technologies and post-petroleum farm practices. Scott is also an OSU Land Steward, contributing on the Advisory Committee and the Mentor Program.

Oregon State University Extension Service offers educational programs, activities and materials without regard to race, color, religion, sex, sexual orientation, national origin, age, marital status, disability, or disabled veteran or Vietnam-era veteran status – as required by Title VI of the Civil Rights Act of 1973. Oregon State University Extension Service is an equal Opportunity Employer. Reasonable accommodations will be provided to those with physical or mental disabilities.
