

Siskiyou Field Institute invites you to...

Trees & Shrubs to Know in Southern Oregon

with Max Bennett

Sunday, June 10th
Deer Creek Center - Selma, Oregon
Tuition: \$50

Learn to recognize the most common conifer and broadleaf trees of the Klamath Siskiyou – and some of the most important and interesting shrub species of the region, for good measure!

You'll discover how to distinguish trees and shrubs by their leaves, twigs, fruit, and bark, and by where they grow. We'll also discuss some of the unique characteristics and "talents" of individual species, and learn to use simple dichotomous keys to help identify trees and shrubs in the field.

For more information, phone (541) 597-8530, or visit www.thesfi.org.
