1. Lbs. gained ________ Number of growing days ________ = Average Daily gain__________
   *(Calculate the average daily gain by dividing the lbs. gained by the number of growing days.)*

2. Cost of feed _______________ lbs. gained ______________ = Cost of Gain ________________
   *(from back sheet)  
   (Calculate the cost of feed per lb. gained by dividing the cost of feed by the lbs. gained.)*

3a. Lbs. of feed fed _______________ Percent dry matter _________ = Dry Matter Fed ________________
   *(from back sheet)  
   (Calculate the dry matter fed by multiplying the pounds of feed fed by the percentage of dry matter divided by 100)*

3b. Lbs. of dry matter fed _________ lbs. gained ________ = Dry Matter Conversion__________
   *(Calculate feed efficiency by dividing the lbs. of feed fed by the lbs. gained.)*

**Treatments & Dewormers (Product & Date)** ________________________________________________

**Medicated Feeds Fed** _________________________________________________________________

(Completing a Daily Feed Record for Market Animals may help with this table.)

### Feed Rations (ingredients and percentage amount)

_________________________________________________________________________________________
_________________________________________________________________________________________
_________________________________________________________________________________________

### Financial Summary

Cost of Animal  ____________________
Cost of Feed   ____________________
Cost of other expenses ____________________
Total Cost   ____________________
Market Value   ____________________
(Floor price x sale weight)

If additional calculations need to be made for Dry Matter Fed, please use the space below.

3a. Lbs. of feed fed _____________ Percent dry matter __________ = Dry Matter Fed _____________
    (from back sheet)
    (Calculate the dry matter fed by multiplying the pounds of feed fed by the percentage of dry matter divided by 100)
