Cascade Oregon Grape (Longleaf Mahonia)  
(\textit{Berberis (Mahonia) nervosa}) 

A very small, spreading, broadleaf evergreen shrub to 2’. Has dull green compound leaves and bright yellow flowers on long stalks that are followed by blue fruit. This shrub can be slow to establish. It spreads slowly, making an elegant tall groundcover for part to full shade areas. The berries are edible and can be a source of winter food for birds.
