

# Maintaining a Healthy Forest in an Uncertain Climate

Discover practical, cost-effective approaches to strengthen your forest's resilience to wildfire, bugs and drought

---

## There are Options!

Higher temperatures, new weather patterns, how is a change in climate impacting your woodlands? Increased drought, wildfire, decreased resilience to insects and disease can kill trees and reduce the value of your forestland. Knowing the risks and taking action to mitigate these impacts on your forest land can save you money in the long run, while improving the health of your forest.

This is a full day workshop for forestland owners of all sizes and management objectives.

**MONDAY, OCTOBER 21<sup>ST</sup>**

**9 AM – 4 PM**

569 Hanley Road, Central Point

Cost: \$15/ individual and \$20/ families

541-776-7371

Accommodations for disabilities may be made by contacting.

Please make accommodation requests by October 14<sup>th</sup>
