Auditorium, 569 Hanley Rd,
Central Point**

Pre-registration: 541-776-7371

Cost: \$10/ person, \$15/couple

JJWSA Members Free

All are welcome!

Dr Christine Buhl is the Forest Entomologist with the Oregon Department of Forestry and board member for the Oregon Bee Project and Salmon Watch.

Oregon is home to more than 500 species of bees, which are responsible for pollinating many of our staple crops and native plants in rural and urban landscapes. The Oregon Bee Project (OBP) is a new collaborative effort tasked with improving the health of these insects and the habitats that support them. This talk examines how Oregon is tackling pollinator health through taking a census of our wild bees, improving bee habitat, preventing pesticide exposure and researching the treats to wild and managed bees. We'll also discuss what you can do to get involved with OBP as a citizen scientist and guidelines on enhancing pollinator habitat on your forest stand.

Agriculture, 4-H Youth, Family & Community Development, Forestry, and Extension Sea Grant Programs. Oregon State University, United States Department of Agriculture, and Jackson County cooperating. The Extension Service offers its programs and materials equally to all people. If you need particular accommodations, please call our Extension Office at 541-776-7371 at least 7 days prior to the event.
