

2020 Grape Red Blotch Disease Webinar Series

Join us for a live webinar series focusing on Grape Red Blotch Disease. This seminar series focuses on research findings from Oregon-based studies conducted by researchers at Oregon State University's Oregon Wine Research Institute and partners at the USDA-ARS. Seminars will cover virus epidemiology, vector identification and biology, grapevine performance, wine production, fruit and wine composition, and wine sensory results. Each seminar will allow a live question/answer session.

ODA pesticide credits are approved for the first five seminars in the series from October 21 to November 24, 2020.

Seminars are free but registration is required in advance.

This series is being brought to you by OSU Viticulture & Enology Extension Programs and the Oregon Wine Research Institute.

October 20, 2020 - 12:00-1:00 PM PST

Where are we now? A deeper understanding of Grape Red Blotch Virus effects on grapevine physiology
Dr. Alexander Levin, Assistant Professor of Viticulture, Oregon State University

1 ODA pesticide credit

Register in advance for this webinar:

https://oregonstate.zoom.us/webinar/register/WN_WOSwZWirSzWoydl6tyD6KQ

October 27, 2020 – 12:00-1:00 PM PST

Efficacy of vineyard management practices for mitigating the effects of Grape Red Blotch Disease
Cody Copp, Graduate Research Assistant and MS candidate, Oregon State University

1 ODA pesticide credit

Register in advance for this webinar:

https://oregonstate.zoom.us/webinar/register/WN_pdwYn1dIRnaP--HwyW1Wlg

November 3, 2020 – 12:00-1:00 PM PST

Review of current knowledge of vectors and epidemiology of Grape Red Blotch Disease
Dr. Vaughn Walton, Professor and Horticultural Entomologist, Oregon State University

1 ODA pesticide credit

Register in advance for this webinar:

https://oregonstate.zoom.us/webinar/register/WN_QCr-gtuERT-crxK433FLlg

November 17, 2020 – 12:00-1:00 PM PST

Vine response to Grape Red Blotch Virus and management tactics in Oregon's Willamette Valley
Dr. Patty Skinkis, Professor and Viticulture Extension Specialist, Oregon State University

1 ODA pesticide credit

Register in advance for this webinar:

https://oregonstate.zoom.us/webinar/register/WN_JewaCWoQQ-SwsTXytthRtg

November 24, 2020 – 12:00-2:00 PM PST

More into the details of Grape Red Blotch Disease diagnosis: When, where, how, and why?
Dr. Achala KC, assistant professor of plant pathology, Oregon State University

Testing insects from vineyards with high incidence of Grape Red Blotch Virus for the ability to transmit the virus

Dr. Jana Lee, Research Entomologist and Dr. Robert Martin, Research Plant Pathologist, USDA-ARS

2 ODA pesticide credit (1 core credit, 1 other credit)

Register in advance for this webinar:

https://oregonstate.zoom.us/webinar/register/WN_zy0E0JikQeybr4dF6nR5pQ

December 1, 2020 – 12:00-1:00 PM PST

Sensory impacts due to Grapevine Red Blotch Virus on Willamette Valley Pinot noir
Samuel Hoffman, Graduate Research Assistant and MS candidate, Oregon State University

Register in advance for this webinar:

https://oregonstate.zoom.us/webinar/register/WN_6nK495BVSxiElvFmtfFnHw

December 8, 2020 – 12:00-1:00 PM PST

Grape Red Blotch Disease: Grape and wine composition

Dr. Michael Qian, Professor of Food Chemistry, Oregon State University

Dr. Alexander Levin, Assistant Professor of Viticulture, Oregon State University

Dr. Patty Skinkis, Professor and Viticulture Extension Specialist, Oregon State University

Register in advance for this webinar:

https://oregonstate.zoom.us/webinar/register/WN_7mag90FGTmuDOMDZE2kSFQ

December 15, 2020 – 12:00-1:00 PM PST

Grape Red Blotch Disease: What we learned and where do we go next?

Review and open discussion session with the entire OWRI Red Blotch Study Team of panelists, including Drs. Achala KC, Jana Lee, Alexander Levin, Bob Martin, James Osborne, Michael Qian, Patty Skinkis, Elizabeth Tomasino, and Vaughn Walton
