Vineyard Red Blotch Workshop
November 29, 2018

Join us for a focused workshop on Grapevine Red Blotch Disease. This workshop will cover information about the virus, insects that may be spreading the virus, how it impacts grapevine physiology and fruit composition, vineyard management practices to ameliorate virus effects, and the effects the virus has on wine quality. Presenters will share the most recent information from research projects in Oregon.

ODA Pesticide recertification credits applied for.

Audience: Commercial wine grape growers/winemakers

Location: Marion County OSU Extension Office, Salem, OR, [map](#)

Time: Thursday, Nov. 29, 10:00 am – 3:00 pm, lunch will be provided

Schedule
