

Flowers for Pollinators

BEES & BUTTERFLIES

CURRY COUNTY MASTER GARDENERS OREGON

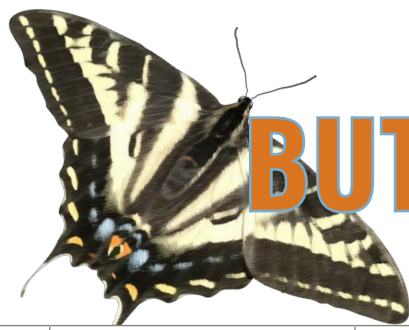

Two lists of flowers for bees and butterflies in PDF file format. The flowers are ones that can be grown in Curry County, Oregon and include natives.

This Southwest corner of Oregon lies in the USDA climate zones 8b, 9a, and 9b. The Pacific Ocean tempers the climate on the coast (9b), making it cooler in summer and warmer in the winter. Inland temperatures can be both colder and hotter based on distance from the coast and altitude. Link below is for the *Oregon Bee Project*.

A cooperative effort between the Oregon Department of Agriculture (ODA), the Oregon State University (OSU) Extension Service, and the Oregon Department of Forestry (ODF) and many others committed to supporting the health of bees.
