This workshop will provide practical methods and strategies to increase any educator's ability to enhance and extend their students' outdoor school experience. Whether you come for the morning to learn about logistics to make your Outdoor School experience a smooth one or stay for a bit longer to explore curriculum development. Participants will come away with the content knowledge, skills, and material that can be used in the field or the classroom before or after their students attend outdoor school.

Outdoor School Training
October 6, Saturday
8-9:30am ODS Logistics
9:45-1pm Curriculum (lunch provided)
