In this class, we will learn about the methods for collecting a soil sample, where to send soil for analysis, and most importantly, how to interpret the results and correct problems. We will use examples from both organic and conventional production systems. Before the class, follow the instructions in this guide (https://catalog.extension.oregonstate.edu/ec628) for collecting a soil sample and have it analyzed by one of the labs listed in this guide (https://catalog.extension.oregonstate.edu/em8677). Bring in the soil test report from your garden, pasture, or field to review during class.

OSU Josephine County Ext. Auditorium
215 Ringuette Street, Grants Pass

THURSDAY OCTOBER 24, 2019
5:30 P.M. TO 7:30 P.M
COST: $15.00
